Frontend Developer with over 4 years of commercial development experience. I specialize in both creating SPA applications from scratch and maintaining existing ones. Worked in both large (~40 developers) and small (~5 developers) teams. I quickly adapt to new conditions, master unfamiliar technologies, and constantly improve my skills

Experience

Frontend Developer

Farsight management

Saint Petersburg

May. 2023 - to present

Worked on the project of an online hotel booking platform

- Completely rewrote the existing hotel room booking project using the UI kit, which increased website traffic and room reservations by 3 times;
- Created a convenient hotel room reservation system: a step-by-step booking form with the ability to select dates, location, number of beds, number of guests;
- Implemented an interactive map that allowed you to search for hotels, various attractions and restaurants on it;
- Legacy updated the code, rewriting class components into functional ones, which accelerated the development of new features
by 30%;
- Optimized application performance by 20% according to Lighthouse metrics;
- Rewrote the application from JavaScript to TypeScript, which reduced unexpected errors in production;
- Configured the linter (ESLint, Stylelint) and formatter (Prettier) to ensure code purity and compliance with development standards;
- Optimized the Webpack configuration by dividing into chunks, which improved productivity by 20%;

Frontend Developer

ITMO University

Saint Petersburg

Apr. 2021 - May. 2023

Worked on creating an analog of Tilda (visual website builder):

- Developed a visual editor for intuitive creation and editing of pages;
- Developed independent blocks that allow you to design pages. Each block had several display options;
- Implemented an adaptive preview mode with switching between desktop, tablet and mobile modes;
- Integrated a text editor and developed its own plug-ins to extend functionality in accordance with the project requirements;
- Interacted with a team of analysts, backend developers and designers to implement functional and business UI/UX requirements;

Worked in a team to create a corporate UI kit:

- Integrated storybook, which accelerated the development of new components;
- Created interactive documentation for the design system;
- Integrated a system of themes (including storybook): light, dark and corporate;
- Implemented unit testing, which significantly reduced the number of errors during the development phase. I personally covered 30% of the code with tests;

Education

State University of Aerospace Instrumentation

Saint Petersburg - 2019
